

V1.0

The diagram illustrates the construction and use of a circular sandbag barrier in three parts:

- Top Left:** A top-down view of a circular barrier made of interlocking sandbags. A central circular opening is visible. Blue arrows labeled "Flow" indicate water approaching from the top and bottom. A label points to the bottom overlap: "2' overlap tightly packed together using wire or zip-ties".
- Top Right:** A side view of the barrier installed in a trench. A "Sand bag or block" is shown being placed into the structure. Blue arrows labeled "Flow" indicate water approaching from the right.
- Bottom:** A side view of the completed barrier in a trench. A grate is placed in front of the barrier. Blue arrows labeled "Flow" indicate water approaching from the right.
